

We have over 55 years of experience in providing the right solutions for our Customers. We work with you to ensure the best possible service at the best possible price. We take a partnership approach, meaning there is much more to the supplier management than just 'brokering services'.

All preferred suppliers are checked for environmental legislation compliance such as duty of care, carrier's certification, and registered disposal facilities and operators licences.

We feedback to Management on the total volume recycled. This is especially important for ISO14001-accredited companies but also for any company with an environmental focus.

We are cost-efficient looking to provide a commercial return to your business either through reducing collection costs or, in many cases, providing an additional revenue stream.

We are flexible, reliable and customer-oriented – our objective is to give you total peace of mind regarding your waste paper and confidential shredding requirements.
